Support: [Wiring Diagram](#) | [Manual \[EN\]](#)

Complete PC VGA Touchscreen TFT solution for the Radio-DIN-slot.

Many features and functions

The fully motorized 7" touchscreen display enables comfortable control. Directly at the front, behind a cover, there is an USB connector, a CompactFlash/SD-card reader and earphone connector. These connectors are "looped through" to the device rear side where you can connect them to your PC.

The integrated AM/FM radio can be used while PC is turned off and the 4x45 amplifier lets you connect your car speakers to the device.

Customized for mobile environment

The display can get wired to vehicle ignition plus line and thereby fade in/out automatically. Besides the touchscreen you can control the display with the included IR remote control unit and the buttons at the front.

Features :

- Motorized 7" Touchscreen display
- AM/FM Radio (useable "Standalone" (PC off))
- Amplifier (4x 45W) for direct connection to car speakers
- USB, CF-/SD-Reader in front
- Fades in/out automatically based on ignition plus
- Infrared remote control unit
- Additional interface buttons in the front

Screen size
Aspect ratio
Dot resolution

Motorized 800 X 480 7" TFT LCD SHARP
16:9 wide TFT screen
2400x480 = 1,152,000 dots
